Professional Summary

Data Analyst with a Master's in Data Science and an Industrial Engineering background, specialized in translating **IT operations, ITSM and compliance needs into analytical solutions**. Over 10 years of progressive experience in IT governance, process quality and operational reporting, evolving into **BI, forecasting and predictive analytics**. Proven ability to build **self-service analytical tools, forecasting models and KPI dashboards** that support decision-making in enterprise environments.

Professional Experience

Tier 1 DevOps Engineer | Softtek | Late 2025 – Present

- Supported IT operations and technical service activities within enterprise environments.
- Monitored operational information and service performance indicators to support incident and service management activities.
- Applied knowledge of IT operations, Service Desk processes, SLAs, and ITSM developed throughout previous analytical and governance roles.

Data Analyst – IT Metrics Team | Softtek | 2024 – 2025

- **Built a Shiny app in R for automated outlier detection:** users upload operational data as CSV; the app applies **Z-Score, IQR and ML methods**, flags anomalous cases, and generates **boxplot visualizations**. Reduced manual review time and standardized anomaly detection across the team.
- **Developed a second Shiny app for time-series forecasting:** trains **Moving Average, Prophet and XGBoost** models with engineered **time and lag features**,

evaluates them using **MSE, MAPE and MAE**, and automatically selects the best-performing model. Enabled self-service forecasting for non-technical stakeholders.

- Analyzed historical operational data to identify trends and support planning and capacity decisions.
- Partnered with business stakeholders to translate requirements into governance-focused analytical solutions and collaborated with the data engineering team, consuming ETL outputs and focusing on modeling, visualization and delivery.

Process Quality Leader | Softtek | 2019 – 2024

- **Led demand planning analytics for ISO/IEC 20000:2018:** developed ticket volume forecasts at **daily, weekly and monthly granularity** using **Holt-Winters, Exponential Smoothing and ARIMA**, presented in a **Flexdashboard**. Supported capacity planning and contributed to a **successful audit outcome**.
- **Automated customer satisfaction survey extraction:** consolidated email survey data into a structured **DataFrame using Python**, enabling trend analysis and reducing manual data preparation time.
- Built **Power BI dashboards** for customer satisfaction trends, operational KPIs, Service Levels Agreements and performance.
- Developed and monitored operational metrics and reports supporting SLA and ITSM governance.
- Supported **ISO/IEC 20000-1:2018** internal and external audits.
- Collaborated with multidisciplinary and international teams to define reporting requirements, metrics, and analytical needs.

Quality Compliance Analyst | Softtek | 2015 – 2019

- Conducted compliance assessments across international IT service teams.
- Developed **Power BI dashboards** to streamline audit reporting and operational monitoring.
- Maintained **zero audit findings for two audit cycles** on a strategic enterprise account.
- Performed data validation, consistency checks, and reporting controls to ensure reliable information.
- Progressively expanded responsibilities from compliance and process analysis into operational reporting and business intelligence.

Career Transition: In late 2025, a financial and organizational redesign affected my Data Analyst position, resulting in an internal reassignment to a **Tier 1 DevOps Engineer** role. This was an organizational decision outside my control, while I continued developing my data analytics profile through my MSc, independent projects, and BI portfolio.

Featured Project

NLP Author Attribution in Political Discourse | Master's Thesis [Link](#)

Developed an end-to-end NLP pipeline to process and classify **928,759 Spanish-language tweets** across **47 author classes** using Python and modern NLP techniques.

- Processed 928K+ records using Python, Pandas, and NumPy.
- Evaluated multiple text embeddings and classification models using MLP and LinearSVC and applied UMAP for dimensionality reduction and exploratory analysis of high-dimensional data.
- Achieved **71.84% accuracy and 0.70 Macro F1** using RoBERTa + MLP.

Education

- **INFOTEC** — Master's Degree in Data Science and Information (Thesis under review) [Credential](#)
- **Tecnológico Nacional de México** — Bachelor's Degree in Industrial Engineering

Certifications

- **Formal:** [Softtek — ISO/IEC 20000 Internal Auditor](#) • [Axelos — ITIL v3 Foundation](#)
- **Continuous Learning:** Kaggle ([SQL](#), [Pandas](#), [Data Viz](#), [Time Series](#), [Intermediate ML](#), [Feature Engineering](#), [Intro to DL](#)) • Udemy ([Math & Stats for ML](#)) • Simplilearn ([Python](#), [R](#))

Languages

- Spanish (Native) • English (Professional Working Proficiency)
